BIOGRAPHY:

Danny Duran is a Senior Consultant specializing in Asbestos Mitigation, Emergency Response, Large Loss Environmental Projects, Construction, Contents Cleaning, and Demolition. He is an expert at reviewing and consulting on architecture, cost, design, engineering, and execution of project parameters, as well as code compliance at the city, state, and federal levels. A fluent Spanish speaker, Danny has worked throughout South America and is a United States Air Force veteran.

SIGNIFICANT CONSULTING PROJECTS:

Assisted Living

Following Winter Storm Uri in Central/Eastern Texas, Danny managed water mitigation, select demolition, all phases of reconstruction and code upgrades to the largest water loss in North American history. He was responsible for the successful turnkey management of approximately 15 locations from Dallas, Waco, Austin, Houston, and others. Between these locations, he managed over 400 separate personnel, subcontractors, and vendors to minimize the impact to both residents and staff of each location.

Educational Facilities

Post Hurricane Harvey, Danny aggressively and successfully managed the disaster response of 5 large schools in the La Marque, TX School District that were severely damaged. His responsibilities included the management of over 300 employees on 5 separate campuses. Key tasks included asbestos abatement, content manipulation, select demolition, and meetings with the city council and proficient scheduling.

Danny also managed disaster response to Hurricane Laura for the Calcasieu Parish Lake Charles, LA. Here he coordinated the recovery of 4 large school campuses that were severely damaged, managing over 125 employees and overseeing asbestos abatement, content manipulation, select demolition and meetings with the school board of directors and proficient schedule management.

Curriculum Vitae Continued

Hospitality

When Winter Storm Uri impacted a hotel in Canyon Lake, TX, Danny managed water mitigation, select demolition of bacterial/microbial effected building materials, and select unit rebuilds because of the largest water loss in North American History. He coordinated over 130 separate personnel, subcontractors, and vendors to minimize the damage to the client. The project size was 63 separate multi-level buildings spanning over 300 acres.

Manufacturing Facility

When a chemical explosion occurred in a plant in Conyers, GA, Danny directed the neutralization of volatile chemicals, and select demolition of office building materials throughout the 100,000 square foot building. Project demolition included the removal of steel trusses and metal decking, then the restoration and rebuild of the facility to code.

PROJECT DIVERSITY:

- Educational Facilities
- Manufacturing Facilities
- Large Loss Environmental Projects
- Large Loss Demolition Projects
- Power Plants
- Assisted Living Facilities
- Hospitality
- Wastewater Treatment Plants
- Hazardous Materials – Asbestos, Mold, Biohazard, Chemical
- Hurricane/Winter Storm Disaster Response
- Civic and Public Buildings
